LANGAUGE

English – level A2

ABOUT ME

I've been working as an economic security specialist in ILLC «RN-West» (oil products retailer that has its filling station net). Due to my desire for learning, developing and gaining new knowledge I paid my attention to information technology sector. To begin with I made my mind to start with a self-study of English. My second step was a study of Front-end development. Further I'm going to learn in back-end development course (PHP/Laravel).
I spend loads of time programming independently and self-studying of English. I try to improve my skills constantly and study new technologies. After kicking off my way in IT-sector I've directed myself to achieve a Teamlead level.
